

# Base Fluids Products

## Renewable Base Oil

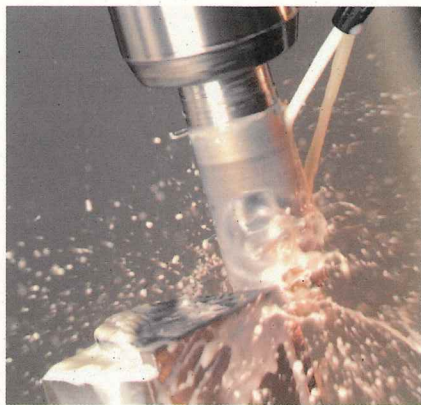

### BIO-REEF

A general application base oil built on a combination of bio-based and re-refined components. It's like API Group III base oils, but with the excellent solvent power of a naphthenic base oil. The product has high VI, low pour point, and low volatility.

## High Solvency Industrial Base Fluids

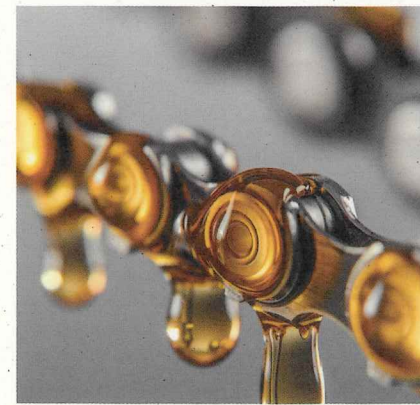

### BIO-BASE

A series of bio-based low viscosity base fluids for industrial lubricants with characteristics similar to naphthenics (high solvency) but also very high VI, high biodegradability, and excellent response to antioxidants. Compatible with most of conventional base oils, plasticizers, additives, and sealant materials.

## Loss Lubricant Base Fluids

### BIO-VYBE

A series of renewable high viscosity base fluids based on natural and modified triglycerides. Applications include process oils, wood treatment, chain oils, rock drilling oils, lubricity improvement, viscosity & tackifying booster, and use as bright stock alternative.

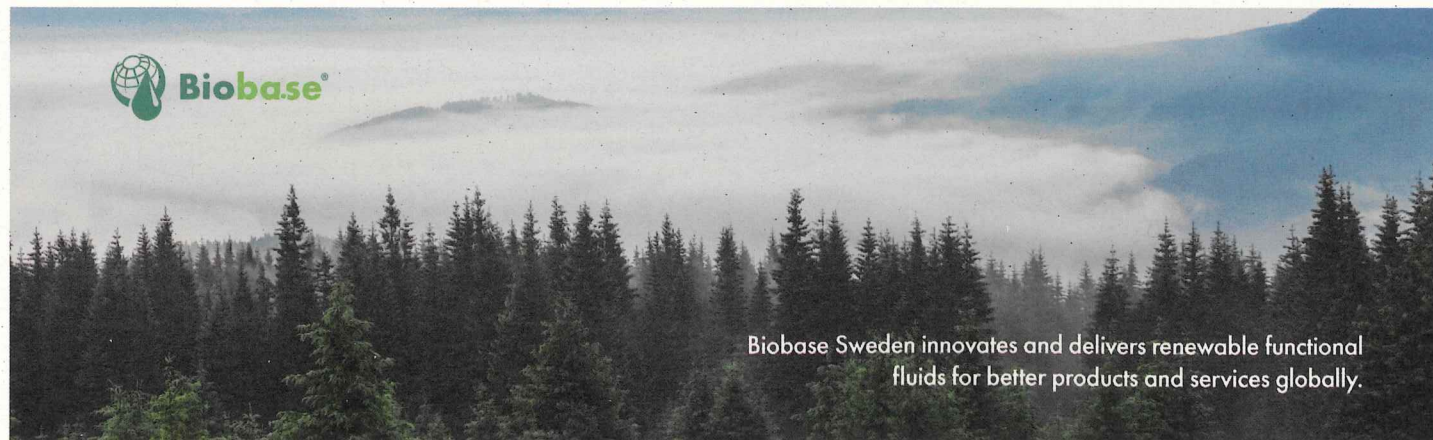

## Bio-based Solvents

### BIO-SOL

A series of solvent bases for various lubricants & functional fluids. The BIO-SOL-series has been developed for the future to meet the demands on environmental friendliness and independence of fossil resources. Like all our products they are REACH-compliant, and not classified as dangerous goods.

Biobase Sweden innovates and delivers renewable functional fluids for better products and services globally.
